How to Whitelist Devices

• Adding a device’s MAC address to the whitelist allows the device to connect without going through the splash page
• The property can add long term guests, special devices like gaming consoles, employee tablets/phones, routers, business center PCs, etc. from 1 day up to 1 year

1. Start by going to https://centralcommand.wayport.net and logging in with the OnQ username and password
2. After the venue loads click on the Configure Tab
3. Then click Add MAC to Whitelist
4. Select the duration of the Whitelist, range from 1 day up to 1 year
5. Copy/Paste or Type in the MAC address of the device or devices in the text box. *(All MAC addresses should have 12 numbers and letters separated by colons “:”)*
6. Click Add – that’s it!
